INTRODUCTION

Wadi Alriyadah is a 100% Saudi-based technology and advisory company helping organizations navigate an increasingly complex digital, cybersecurity, and regulatory landscape. We support organizations in strengthening cybersecurity, adopting Artificial Intelligence responsibly, modernizing technology, and accelerating secure and sustainable digital transformation aligned with their business objectives and national priorities.

Our approach begins with understanding the business, its strategic priorities, operating environment, challenges, risks, and opportunities. By bringing together technology advisory, cybersecurity, enterprise security architecture, AI, governance, risk & compliance, and modern technology solutions, we help organizations make informed decisions and translate business needs into practical, secure, scalable, and resilient outcomes.

At Wadi Alriyadah, our focus goes beyond delivering technology or implementing individual solutions. We focus on creating measurable and sustainable business value. Working alongside our clients as a trusted advisor, we develop practical strategies, establish effective governance, strengthen cybersecurity and compliance, design secure architectures, select and implement fit-for-purpose technologies, manage digital and cyber risks, and build capabilities that support long-term organizational success.

Our goal is to build trusted, long-term partnerships that enable our clients to operate securely, innovate responsibly, improve efficiency, strengthen resilience, and confidently embrace emerging technologies. Through local expertise, independent advisory, and practical execution, Wadi Alriyadah helps organizations build the capabilities required for sustainable growth and contribute to the digital ambitions of Saudi Vision 2030.

COMPANY

VISION & MISSION

OUR VISION

To shape a future where technology, cybersecurity, and AI empower organizations to lead with confidence, embrace innovation, and unlock new possibilities while building lasting digital resilience and contributing to Saudi Arabia's ambitious, secure, and sustainable digital future in alignment with Vision 2030.

OUR MISSION

To partner alongside executive leadership as a trusted collaborator, delivering measurable business value by aligning strategic advisory, robust cybersecurity, and scalable technology solutions with organizational goals. We empower clients to navigate evolving risks, establish effective governance, build sustainable capabilities, and drive future-ready growth.

OUR CORE VALUES

Wadi Alriyadah values guide how we conduct business, innovate responsibly, and build trusted partnerships.

1. Integrity & Trust
2. Client Value
3. Responsible Innovation
4. Excellence
5. National Impact

Majed Alshodari
Managing Director

A MESSAGE FROM OUR LEADERSHIP

A very warm welcome to Wadi Alriyadah.

In today's rapidly evolving business landscape, digital transformation is no longer simply an opportunity; it is essential to sustainable growth and competitiveness. Artificial Intelligence, cloud technologies, and digital innovation are creating extraordinary possibilities, while also introducing new cybersecurity risks, regulatory responsibilities, and business challenges.

At Wadi Alriyadah, we believe technology should always serve a clear business purpose. As a 100% Saudi-based technology and advisory company, our role is to bridge strategy and execution, helping organizations make informed decisions, manage risk effectively, embrace innovation responsibly, and achieve measurable and lasting business value.

By bringing together strategic advisory, governance, risk and compliance, cybersecurity, Artificial Intelligence, and modern technology solutions, we work closely with our clients to transform complex challenges into secure, practical, and scalable outcomes. More importantly, we seek to build relationships founded on trust, integrity, shared ambition, and long-term success.

Inspired by Saudi Vision 2030, we are committed to contributing to a secure, innovative, and resilient digital future for the Kingdom. We look forward to working alongside our clients and partners, creating meaningful impact, strengthening capabilities, and shaping the opportunities of tomorrow together.

Sincerely yours,
Majed Mohammad Alshodari

"Technology alone does not create transformation. True transformation begins with vision, is strengthened by governance, and sustained by security. At Wadi Alriyadah, we serve as a trusted advisor, turning complex technology challenges into practical, secure, and scalable business outcomes."

**INDEPENDENT
ADVISORY, BOARD
& COMMITTEE
SERVICES**

BRIEF

Our advisory, board & committee services provides board-level guidance across governance, risk, IT audit, and digital transformation subcommittees, alongside confidential 1-on-1 advisory for Boards, CEOs, and Ministers. We bring objective oversight to align complex technology and cyber decisions directly with executive strategy.

Members drive business value by identifying strategic initiatives, matching committee goals to organizational objectives, and applying global benchmarking. This ensures every outcome fulfills regulatory requirements while strengthening long-term enterprise resilience and performance.

Serving as an objective, expert voice, the independent committee member collaborates directly with CIOs, CTOs, and executive leadership to evaluate vendors, recommend strategic technologies, and safeguard the organization's commercial interests during complex decision-making.

Acting as a trusted guide, the independent member provides an unvarnished, external perspective that elevates corporate credibility, strengthens regulatory compliance, and reinforces governance standards. By actively contributing across key board and steering committees, the independent member ensures that every strategic initiative is executed with transparency, discipline, and long-term business value.

ACT TODAY

The independent advisory, board & committee services brings clear perspectives, focus and the opportunity to participate objectively. Furthermore, it provides the framework to facilitate better decision-making outcomes. In addition, the service enables improved leveraging as a result of the experience and knowledge possessed by reliable contacts who engage with counterparts with the requisite proficiencies.

The demand for the independent advisory, board & committee services

The autonomy of the independent committee member will assist in connecting the management's interests with that of shareholders' and improve the quality of judgement in decision-making in the relevant committee. The importance and demand for independent committee members has arisen with each and every corporate for an unlimited number of reasons. Here are the most common ones:

- 1 Independent committee member is impartial and objective
- 2 Independent committee member brings focus and depth of perspective about your industry, company
- 3 Independent committee member bolsters where there is room to grow or need for urgent changes, or seeking new opportunities
- 4 Plays a pivotal role in neutralizing any conflicts that arise in the committee
- 5 Independent committee member can mentor and share required skills or perspective needed by executive team via casual or more formal conversations

PAIN POINTS

Lack of transformation and technology representation and expertise in the board committee and subcommittees

Lack of transformation, information security governance and technical project management

Lack of transformation and technology benchmarking experience

NATURE OF ENGAGEMENT

A key benefit of engaging independent advisors and committee members is the objective, high-level perspective they bring to executive decision-making. By combining strategic foresight, regulatory insight, and deep technical expertise, our independent experts help organizations accelerate digital transformation, bolster cybersecurity resilience, and maintain rigorous governance.

The following section outlines our proposed engagement structure, highlighting the areas where Wadi Alriyadah can contribute, collaborate, and deliver value to the client.

Senior Committees

- Board Committee
- Executive Management Team Committee

Governance Subcommittees

- Corporate Governance
- Business Continuity
- Information Security

Technical Subcommittees

- IT Steering
- Information Technology
- IT Disaster Recovery
